Jordan Da Graca

Web Design & Development

Introduction

Hi, I'm Jordan. I'm passionate about web design and development, and fresh out of my postgraduate studies, I'm looking to apply my learnings in a development environment with particular stringent focus on front-end web development. As a firm champion of creative thinking, I idealise creative problem solving to create functional,modern web applications in accordance with modern guidelines.

What initially started as a hobby quickly became a future career prospect as I undertook four years of university to obtain a postgraduate degree in the subject area.
